Let's build a new generation of tree software together

- **Open source**: commercial-friendly: MIT
- **Open standards**: GEDCOMX
- **Cloud-native**: K8s, Serverless
- **Multiple platforms**: mobile, web, desktop
- **Modern languages and architecture**: Golang, Flutter
- **Extensions:** first-class citizens
- **Bridge:** community and personal, commercial and non-profit trees
- **And one more thing**

Decentralized!

Please email me to get involved

Also to get involved building an *open-source record manager*

Dallan Quass

BS and MS in CS from BYU, PhD in CS from Stanford. Co-founder of Junglee, acquired by Amazon.com, FlipDog, acquired by Monster.com, and WhizBang Labs, an early machine-learning company. Past CTO at FamilySearch. Principal developer of WeRelate.org and GenGophers.com, both in Family Tree Magazine's top 101 genealogy websites, and RootsFinder.com, acquired by Findmypast.
