# *DVD Media*

## ⊕ DVD-ROM

- ⊕ High ramp-up costs to produce a run
- ⊕ Moderate market penetration compared with CD

## ⊕ Recordable DVD

- ⊕ DVD-R, DVD-RAM, DVD-RW, DVD+RW, DVD+R
- ⊕ Incompatibility issues
- ⊕ Second generation drives are just now being released

# *Managing Larger Collections*

- ❖ Typical project: 2000 CD's
- ❖ Possibilities:
  - ❑ Distribute on roughly 100 DVD's
  - ❑ Provide Web-based access
  - ❑ Distribute index CD or DVD with links to online full-resolution repository
- ❖ In any case, full-resolution online repository might be desirable

## *Storage Requirements*

$$\begin{aligned} & 2000 \text{ CD's} \\ \times & 60\% \text{ typical capacity} \\ \times & 680 \text{ MB} \\ = & 816 \text{ Gigabytes} \end{aligned}$$

- ✚ Can be purchased off the shelf for less than \$15,000

## *Bandwidth Challenges*

- ✦ In spite of huge investments, bandwidth is still an issue
  - ✦ My North Orem neighborhood, for example, is not economically served by broadband
- ✦ Great opportunity for multi-resolution browsing techniques

# *Transcripts*

- ✦ Text has excellent properties
  - ▣ Easier to index and search
  - ▣ Lower bandwidth requirements
- ✦ Could solicit volunteers to help transcribe
- ✦ Offer incentives:
  - ▣ Training
  - ▣ Free access to the repository
  - ▣ Fame

## *Summary*

- ✦ Quantity of historical documents is practically unlimited
- ✦ A variety of digital library technologies and strategies will be required
- ✦ Most of the technology we need is already available
- ✦ Strategies and business cases need to be worked out
