Key Features

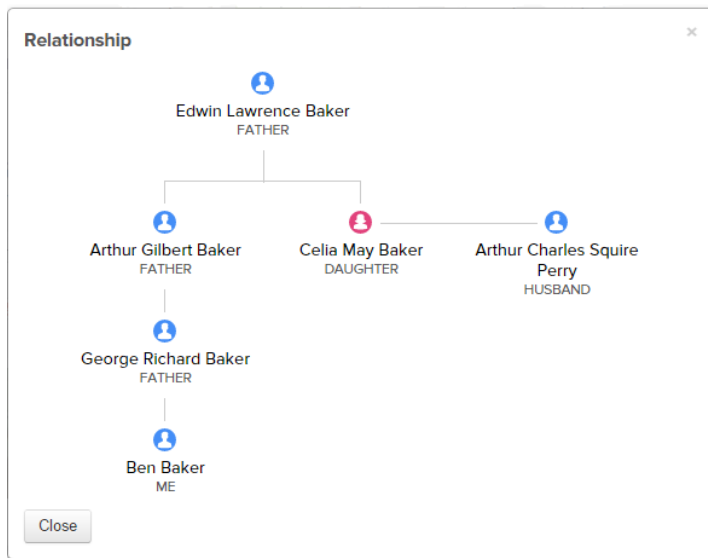

Augments scope of interest

Sorted by closeness of relation using WRD

Enables working with closest relatives in meaningful ways

New Relationship Viewer

Key Features

- Can handle any combination and number of parents, children and spouses
- Supports zooming and dragging to pan the relationship path
- Uses svg images for icons and text, allowing crisp presentation at all zoom levels
- Shows person ids and provides direct links to all persons in the relationship path
- Already used in Family Tree to view relationships to persons within the scope of interest
